experience

New Relic | Manager, Software Engineering

2022 to Present

Lead a team of engineers that develops the content tooling, sites, and services that power our open source docs / developer websites, as well as in-product help / onboarding content.

- Lead and participate in system design and architecture planning.
- Establish and track team health, system health, and key business metrics to ensure team success.
- Work closely with product managers / leadership / key stakeholders to shape our roadmap, and manage / prioritize the team's work.
- Coach and support engineers to grow their career, take ownership of their work, and do work they're proud of.

New Relic | Software Engineer

2017 to 2022

Develop and maintain sites, services, and content tooling to help New Relic's customers onboard and get the most out of the product. Served on and helped lead various teams such as Developer Experience, Developer Enablement, UX Product Language. Served in various orgs such as Growth - User Lifecycle, User Experience Platform, and Experience Design.

- Provide technical input into roadmap planning, prioritize backlog, prototype, scope and plan upcoming work.
- Maintain and grow open source content contributor system from 400+ contributors.
- Improve internationalization system to scale reliably and to support adding full coverage of an additional language in days with machine translation.
- Develop new sites, product UI views, and system to support an program called Instant Observability (collection of quickstart bundles for users to start monitoring their software quickly).
- Migrate Drupal site to Gatsby + Github based system with automation for internationalization, syncing content via various services to New Relic's product UI.

Freelance | Software Engineer

2012 to 2016

Develop WordPress and custom PHP sites for various clients for marketing, portfolios, project management needs.
