clinton-langosch 🔗

Full stack engineer with some back end experience. Steeped in CMS development, in-product help, and services that connect them. I'm currently a software engineer / technical product manager at New Relic.

Skills: React · Javascript · Apache · GraphQL · PHP · HTML · CSS / SCSS · Node.js · MySQL · MongoDB

Experience

New Relic
Aug 2020 to Present

Software Engineer / Technical Product Mgr, Developer Enablement

We develop and maintain sites and services around technical content, product documentation, and opensource projects to help developers get the most out of New Relic.

- Migrate from Drupal to GitHub + React static site to be fully open sourced and part of JAM stack
- Develop various React / Node based sites including docs.newrelic.com, developer.newrelic.com, opensource.newrelic.com, and our `gatsby-newrelic-theme`.
- Develop and maintain services that connect help content to the product UI.
- Develop and maintain translation workflows / tooling to localize content into many different languages
- Serve as technical product mgr to help develop roadmap, prioritize backlog, scope and plan upcoming work, provide technical input in strategic decisions

New Relic
Oct 2017 to Aug 2020

Software Engineer   Portland, OR

Develop Drupal-based content management system on front and back end for docs.newrelic.com and learn.newrelic.com.

- Lead Docs as a Service (DaaS) initaitive to build out REST API / JSON resources to enable other teams to integrate with our site. Examples: programmatically publish release notes, install procedures in the product UI, data dictionary terms fed to UI to display definitions to users in product UI, etc.
- Develop prototype of product UI component (called Nerdlet) in React.js to surface search results from disparate sites.
- Develop integration to translate site in Japanese

New Relic
Aug 2014 to Oct 2017

Technical Writer   Portland

Research and write technical documentation and tutorials for the company's performance monitoring software products. Help develop and manage Drupal CMS
